

## Spatial Resolution Module

### >>>Instruction<<<

#### Product Introduction and Structure

##### Spatial resolution module

The spatial resolution module has at least one effective line pair corresponding to (1.6, 1.8, 2.0, 2.2, 2.6, 3.0, 3.4, 3.8) Lp/mm (including three materials). The three materials are aluminum, stainless steel, and tungsten.

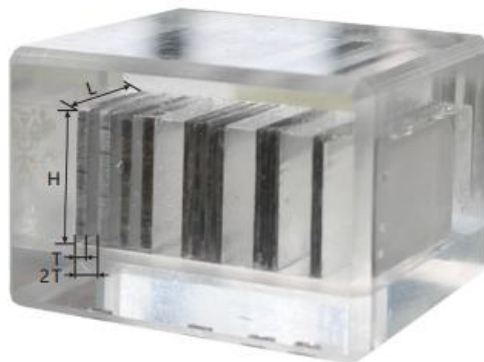

Figure A. 1 Three-dimensional structure of the line pair card

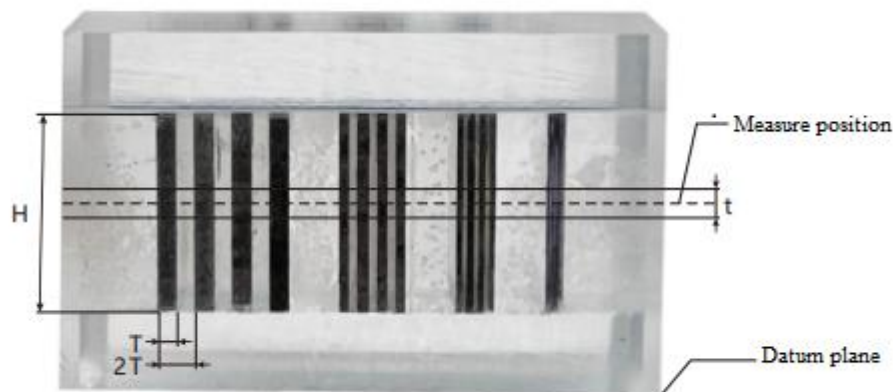

Figure A.2 Front View of Wire Pair Card

##### Explanation:

T - Thickness of the thin slice, which is also the gap width between adjacent thin slices;

L - Length of the thin slice;

H - Height of the thin slice;

t - Thickness of the slice for CT scan.
